SECTION A - SUPPLEMENTAL INFORMATION

THE PURPOSE OF THIS AMENDMENT IS TO PROVIDE CLARIFICATION FOR THE REQUIRED PLOTTING SHEETS, NSN 7530-00-656-0812 AS FOLLOWS:

Plotting Sheet, Polyester Film, 1,000 Meter Grid, 1:25,000 Scale, Size 35 X 47 inches

1. Material. The plotting sheet shall consist of a sheet of polyester film conforming to the requirements of L-P-377 uniformly processed on both sides. After processing, the plotting sheet shall be not less than 0.004 nor more than 0.007 inch thick.
2. Surface.
  - 2.1 Drafting Surface. The obverse or drafting side of the plotting sheet shall be chemically coated, chemically etched, mechanically grained or otherwise treated in order to produce a surface that will readily accept pencil and drafting ink. Lines inked on the surface shall be sharply defined without feathering or breaks visible to the unaided eye and the ink shall not chip or flake from the surface. The drafting surface shall accept, under normal pressure, without permanent indentation which would result in fracture ghosting, lines drawn by a well-sharpened 6-H graphite drawing pencil.
  - 2.2 Gridded Surface. The reverse or gridded side of the plotting sheet shall readily accept the ink used to print the grid. The grid lines shall be sharply defined and without feathering or breaks visible to the unaided eye. The ink used shall be black waterproof of such quality as to produce opaque lines of uniform character and surface throughout the printed sheet.
3. Grid.
  - 3.1 A 1000 meter rectangular grid system, plotted to a scale of 1:25,000, shall be printed on the reverse side of the plotting sheet. Grid lines shall be parallel to the edges of the sheet, within 1/16 inch, and shall be printed in such a manner that the distance from any sheet edge to the nearest grid line parallel to that edge is not greater than 1 inch.
  - 3.2 The grid lines shall extend to all edges of the printed grid rectangle on the sheet and shall be approximately centered on the sheet. The width of the grid lines shall be 0.008 inch, plus or minus 0.001 inch. The distance between centers of any two opposite grid lines in a grid square shall be 1.57 inches and the diagonal of the grid square shall measure 2.22 inches.
  - 3.3 Accuracy. When the plotting sheets are measured, the center-to-center distance between any two printed grid lines shall be correct to within one part in 2000 or 0.003 inch, whichever is greater. For grid lines 6 inches or less apart, the tolerance is +/- 0.003 inches. For grid lines which are more than 6 inches apart, the tolerance is +/- 1 part in 2000 (i.e. +/- 0.05 percent of the theoretically correct distance.)
4. Light Transmittance. The visual light transmittance of the plotting sheet shall be not less than 50 percent.
5. Size and Trim. The plotting sheet shall be 35 x 47 inches. The tolerance for each size shall be +/- 1/16 inch in each dimension. The sheet shall be trimmed square on four sides and shall have smooth edges. The dimensions of the diagonal measurements shall be within +/- 1/16 inch.
6. Identification and Marking. Each plotting sheet shall be identified in accordance with MIL-STD-130 and, in addition, shall have Plotting Sheet, Polyester Film, 1,000 Meter Grid, 1:25,000 Scale, Drafting Side, Mark on the Side printed on the lower right hand corner of the sheet outside the grid rectangle and inch +/- 1/16 inch from the lower edge. The lettering shall be 0.15 inch high and shall be clear and distinct, as well as reading correctly when viewed from the drafting side of the plotting sheet.
7. Workmanship. The plotting sheet shall be free of any dirt spots, slime, oil, or foreign matter; any tear, hole, blister, blow, check, lump; any warp, buckle, wave, wrinkle; any ragged, uneven, crushed or broken edges; or any other defects which may impair its appearance or serviceability. The coating shall be uniform and continuous on both sides of the sheet.
- 8 Quality Assurance Provisions. Paper shall be inspected to insure conformance to all the above requirements.

THE SOLICITATION CLOSING DATE OF 18 OCT 2002 REMAINS THE SAME.

POTENTIAL CONTRACTORS ARE REMINDED TO SUBMIT PROPOSALS ELECTRONICALLY IN ACCORDANCE WITH CLAUSE ENTITLED, "ELECTRONIC BIDS/OFFERS" ON PAGE 36 OF THE SOLICITATION.
